

1

Windows PC operation system required for Optimus installation.

Note: It is recommended to turn off firewall settings before PC software installation.

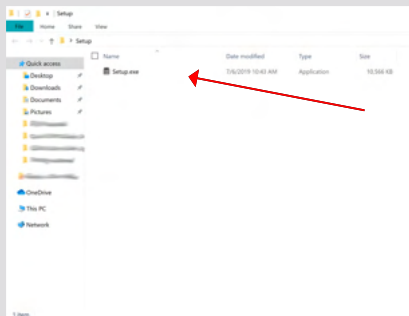

2

Go to www.e-xteq.com. Click the **OPTIMUS DOWNLOAD** icon in the upper right-hand corner of the screen.

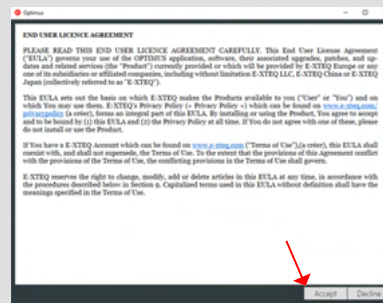

Note: If Optimus is already installed on your computer, skip to

3

After the Optimus file is finished downloading, locate and open it to run the OptimusSetup.exe file.

4

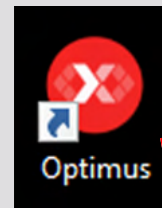

Follow the prompts to continue the installation process.

5

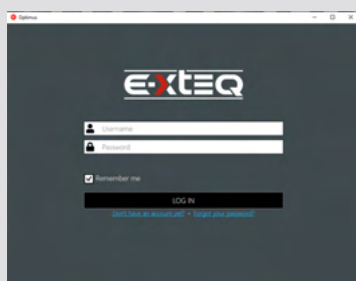

Connect your device to the PC using the USB cable included in the kit. This will allow a two-way connection between your device and PC.

6

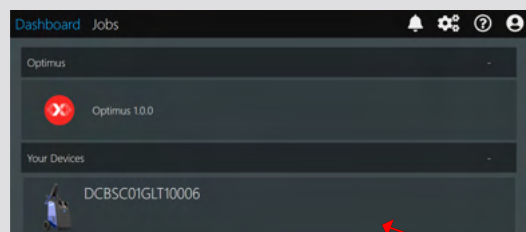

After Optimus has installed, locate and double click the Optimus icon on your desktop.

7

Optimus will ask you to enter your Username and Password. If this is your first time, you will have to register for an account on Optimus.

8

The tool will be recognized by Optimus. Click on your Device for update. Your device will complete the update automatically if any available.
